*Board Certified Orthopedic Surgery*

*Fellowship Trained Sports Medicine*

To whom it may concern:

Where to start about Jmar Marketing Concepts? Mark is an amazing person. He is not about making a quick buck, but he is certainly about helping you understand the whole SEO picture and making sure your company is successful. From the beginning he made me feel comfortable in a field I knew very little about. He's a top notch professional that knew how to affectively improve our SEO standing and because of that our website has ranked among the first pages of Google for many key words. Before he took over, our website had a few questionable rankings and Jmar Marketing Concepts knew exactly how to address each situation. With our ever changing environments within the analytics of the World Wide Web, it should be mandatory that all business hire a professional, such as Jmar to have a competitive edge. As a Health Care Professional, Executive Director and business owner within the community for over 25 year, I don't take authoring these types of recommendations lightly. If you are considering Jmar Marketing Concepts, have trust and confidence in the fact that Jmar Marketing Concepts will do everything possible to create success in your business. If you have any questions, don't hesitate to call my cell and I'd be happy to share our experience with you.

Sincerely

Mario R. Moya, ATC/L, MBA

Executive Director
